Zero Hunger

Para. 1

challenges

821 million;
one in nine

hunger

malnutrition

one in three

lead to

suffering and poor health

**slow progress
(in education and employment)**

What did global community do in 2015?

Para. 2

challenges

what efforts did

Goal 2: zero hunger

misfortune or change.

aim

pledge to

end hunger
achieve food security
improve nutrition
promote sustainable agriculture

(provide nutritious food
to those in urgent need)

humanitarian
food assistance

keep saving the same lives each year

(address the root causes
of hunger)

complementary
programmes

build the resilience of communities

Para. 3

challenges

efforts

progress

216 million fewer hungry people

signal word

But

there is still a long way to go

collaborate

civil society organizations

governments

citizens

private
sector

What solutions can you think of to achieve zero hunger?

Our vision: five steps to Zero Hunger

Step 1: Put the furthest behind first

the most vulnerable/the poorest
in remote areas

Step 1: Put the furthest behind first

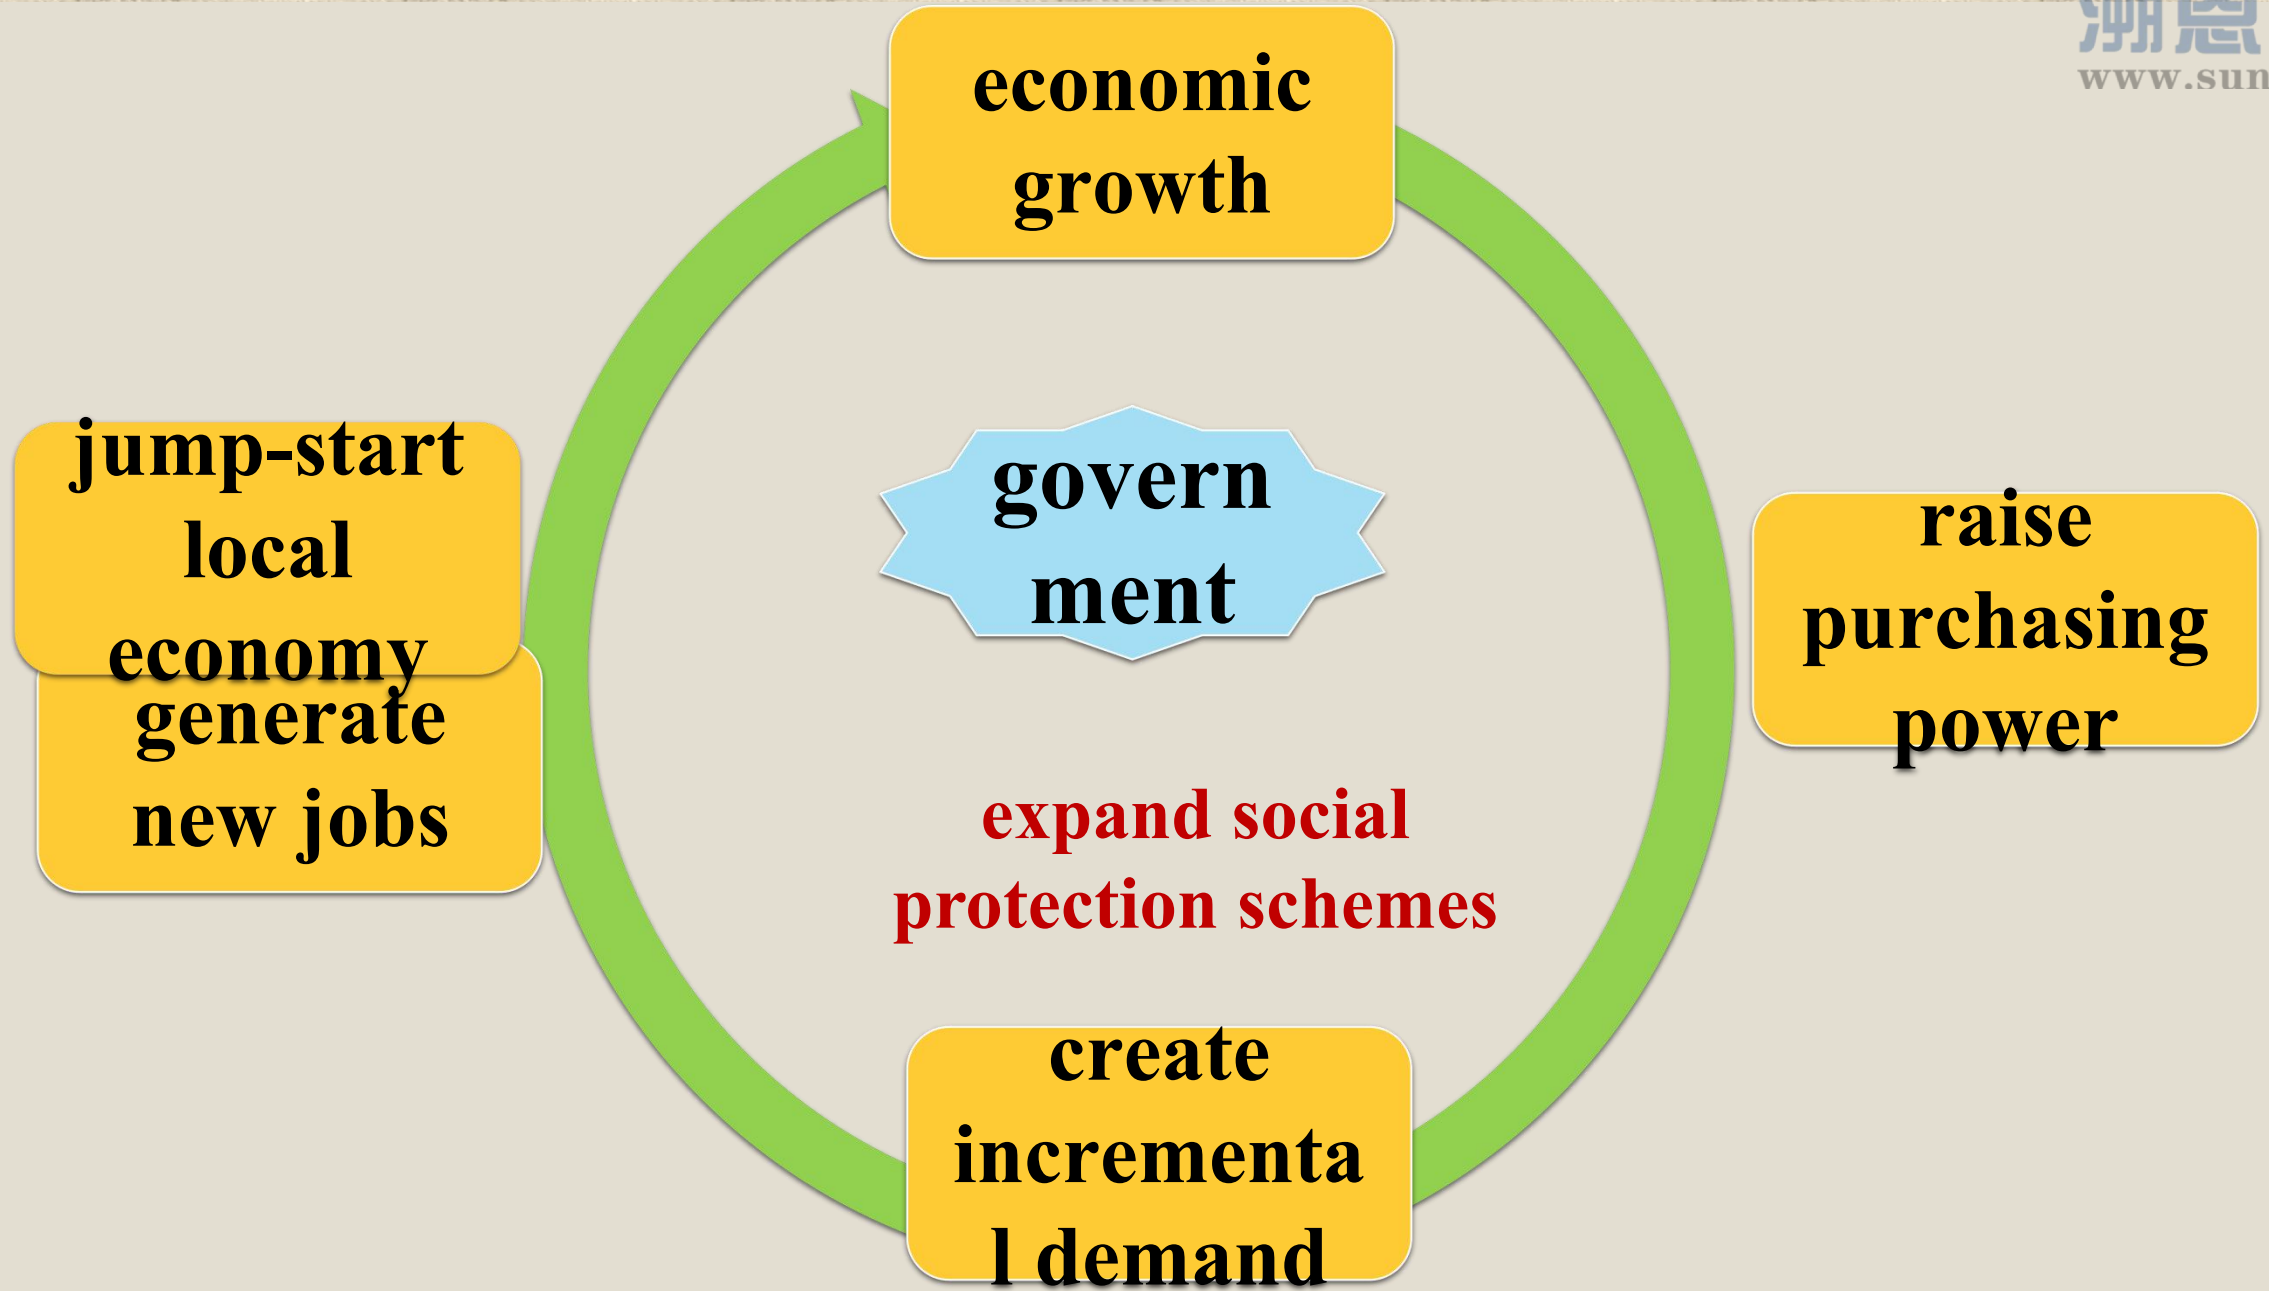

Huamao Village, Zunyi, Guizhou Province

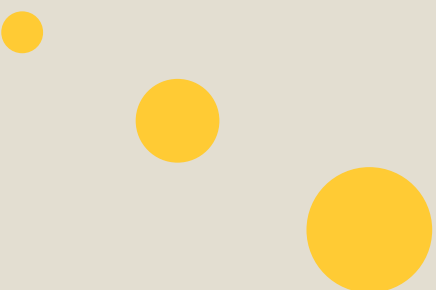

**expand social
protection schemes**

agricultural garden

Step 1: Put the furthest behind first

If we want to achieve zero hunger, first of all, we should take the situation of the most vulnerable into consideration.

Zero Hunger

Step 1: Put the the most vulnerable

Is it easy for the vulnerable to make a better life only with farm produce?

rural infrastructure

storage

electrification

farm

storage

food supply chain

market

transport

Step 1: Put the furthest behind first

Step 2: Pave the road from farm to market

*to make it possible
or easier for
something to follow*

Zero Hunger

Step 2 food supply chain farm to market

the most vulnerable

Step 3: _____

farm

storage

food supply chain

market

transport

in developing countries
crops go **unused** or **unprocessed**

poor storage

poor transportation

wasted

in developed countries

food is often wasted **on the plate**

Step 1: Put the furthest behind the first

Step 2: Pave the road from farm to market

Step 3: Reduce food waste

Zero Hunger

food supply chain

Small quantity of food waste

the most vulnerable

Step 4: Encourage a sustainable variety of crops

Step 5: Make nutrition a priority, starting with a child's first 1000 days

1. What do we eat as staple food(主食) ?
2. What if the climate doesn't allow the growing of those crops any longer?
3. **How** can we ensure a child's healthy development and **when** is the key period?

Step 4: Encourage a sustainable variety of crops

Step 5: Make nutrition a priority, starting with a child's first 1000 days

What do we eat as staple food(主食)? What if the climate doesn't allow the growing of those crops any longer?

rice

soy

corn

wheat

explore and identify a more diverse range of crops

famers:
tools and skills

community:
educate

Step 4: Encourage a sustainable variety of crops

Step 5: Make nutrition a priority, starting with a child's first 1000 days

How can we ensure a child's healthy development and when is the key period?

Ensure children and nursing mothers to have access to the **required nutrition foods**, particularly **in the first 1000 days**.

Zero Hunger

food supply chain

quantity

the most vulnerable

Sustainable agriculture a
variety of crops

Zero Hunger

Food

People

food supply chain

quantity

variety

quality

the most vulnerable

Step 5: Make **children** priority,
starting with a

nursing mothers

Creative Thinking

Write a short paragraph by using the new words we have learnt today.

Support small farmers with advanced technology

Most African farmers are less productive than a US farmer was 100 years ago. It is agreed that supporting and training farmers is the priority to future food security. To promote sustainable and durable farming skills, governments, organizations and scientists can collaborate to provide a combination of aid, education in high-tech methods such as better rice planting and irrigation, and the introduction of better seeds and fertilizer could spark a green revolution in Africa.

An end to malnutrition in all its forms

Malnutrition is both a driver and an outcome of poverty and inequality. Undernutrition can also lead to hidden hunger, wasting and stunting, which causes irreversible damage to both individuals and society. This should be supported by a multi-sectoral approach which includes nutrition-sensitive health care, water, sanitation, education, agriculture, social protection and specific nutrition interventions, coupled with initiatives that enable empowerment of women.

Thank you!
