One Possible Version:

Dear Tom,

Time flies! It's been half a year since you returned to America. How is everything going on with your life and study now?

I intend to recommend an original English classic to help students in our school broaden their vision and enrich their minds. Classic books provide profound ideas, showing us the right attitude toward life. To be frank, I find it challenging to select a suitable one. Would you please give me your advice? Hopefully, you will list some works with respective features.

I am grateful and looking forward to your early reply!

Yours,
Li Hua

2. 参考范文

One possible version:

The family carried on with the experiment for the 6 months without technology controlling their lives. Ms. Margaret believes they all came out better for the experience. The children had a lot more interaction with each other and with their mother. Now that they could not text others, they had to actually see each other and talk. Meanwhile, the family played board games together, cooked meals together and read the newspaper together. Bill ended up developing a serious interest in music, and in Susan's case, she improved her grades in school.

Ms. Margaret wrote the book she had planned. The book became an immediate hit and aroused great interest among many parents. In her book and in interviews about the book, Ms. Margaret describes the pleasant changes that happened in her family and the progress her children have made. She encourages families to set aside special "screen-free days" where families unplug themselves and spend time together, which is exactly what her family have agreed to do after returning from an enjoyable family trip abroad.
