The Daily News

By Robert Woodhouse Monday, 27 December 2004

The most powerful earthquake in the past 40 years caused a tsunami that **crashed** into coastlines across Asia yesterday, killing more than 6,500 people in Indonesia, India, Thailand, Malaysia, and at least four other countries. Fishermen, tourists, hotels, homes, and cars were **swept** away by huge **waves** caused by the strong earthquake that reached a magnitude of 9.0. The undersea quake **struck** around 7:00 a.m., Sunday off the west coast of Indonesia's Sumatra Island. In that area

alone, at least 1,870 people were killed.

In Sri Lanka, some 1,600 kilometres west of the quake centre, the number of deaths stood at 2,498, and one million more were affected by the tsunami, government officials said. Indian officials said as many as 1,900 had been killed along the southern coast. Another 254 were found dead in Thailand and 54 in three other countries. In southern Thailand, 1,900 people were hurt and many more were missing, local officials said.

"I was having breakfast with my three children when water started filling my home. We had to leave everything and run to safety," said Chandra Theeravit, a local Thai woman.

Thousands of people are still missing, and the number of deaths is expected to grow even higher over the next few days. Foreign aid is being organised for the tsunami-hit countries. However, dangerous conditions and damaged roads will make it difficult to **deliver** food and supplies.

THE NIGHT THE EARTH DIDN'T SLEEP

Event

Strange things were happening in the countryside of northeastern Hebei. For several days, the water in the village wells rose and fell, rose and fell. There were deep cracks that appeared in the well walls. At least one well had some smelly gas coming out of it. Chickens and even pigs were too nervous to eat, and dogs refused to go inside buildings. Mice ran out

Date
Place

An earthquake hit Tangshan China on 28 July 1976.

(2). Review the main points of each paragraph.

Part 2 (paragraph 2 & 3): The effect of the earthquake

At 3:42 a.m., everything began to shake. It seemed as if the world were coming to an end! Eleven kilometres directly below the city, one of the most deadly earthquakes of the 20th century had begun, a quake that even caused damage more than 150 kilometres away in Beijing. Nearly one third of the whole nation felt it! A huge crack, eight kilometres long and 30 metres wide, cut across houses, roads, and waterways. Hard hills of rock became rivers of dirt. In less than one minute, a large city lay in **ruins**. Two thirds of the people who lived there were dead or injured. Thousands of children were left without parents. The number of people who were killed or badly injured in the quake was more than 400,000.

Effect

Everywhere survivors looked, there was nothing but ruins. Nearly everything in the city was destroyed. About 75 **percent** of the city's factories and buildings, 90 percent of its homes, and all of its hospitals were gone. **Bricks** covered the ground like red autumn leaves, but no wind could blow them away. Most bridges had fallen or were not safe to cross. The railway tracks were now useless pieces of **metal**. Tens of thousands of cows, hundreds of thousands of pigs, and millions of chickens were dead. Sand now filled the wells instead of water. People were in **shock**—and then, later that afternoon, another big quake shook Tangshan again. Even more buildings fell down. Water, food, and **electricity** were hard to get. People began to wonder how long the disaster would last.

Effect

(2). Review the main points of each paragraph.

Part 3 (paragraph 4 & 5): The following events after the quake

Soldiers and medical workers came and began rescuing and rebuilding the city soon after the quakes.

Following event

Tangshan started to revive itself and get back up on its feet. With strong support from the government and the tireless **efforts** of the city's people, a new Tangshan was built upon the earthquake ruins. The new city has become a home to more than seven million people, with great improvements in transportation, industry, and environment. Tangshan city has proved to China and the rest of the world that in times of disaster, people must unify and show the **wisdom** to stay positive and rebuild for a brighter future.
